

**Nordic Congress in the field of Visual Impairment, September 10-12,
2025
Scandic Park Sandefjord in Norway**

Theme: Inclusion and quality of life in the field of Visual Impairment.

Welcome to the 11th Nordic Congress in the field of Visual Impairment.

The congress is aimed at professionals working with people with visual impairment and blindness, of all ages.

We live in a visually demanding world and knowledge in vision education is more important than ever! Our professional knowledge helps to improve the quality of life and promote the inclusion of people with visual impairment at all stages of life. We can contribute to the adaptation and development of skills and knowledge to achieve independent living.

The vision of the Congress is to strengthen the professional identity of vision education. To be a place where research and practice meet, striving to create a platform for the exchange of experiences and knowledge between professionals from the Nordic countries.

The Nordic Congress in the field of Visual Impairment will take place over 3 days and will include lectures and workshops. This time we will also try something completely new; Teachmeet, where everyone can show short examples or tips from their practice. For more information on the concept, please visit our website.

Feel free to register your interest in holding a workshop!

Exhibitors and suppliers of visual aids and technology will be presented and joining the exhibition area.

Information about the congress will be continuously updated on www.nordisksynkongress.com
